## WATCH CINEQUEST HIGHLIGHTS

## SOFTWARE ENGINEER INTERNS & FELLOWS

Cinequest has exciting opportunities for emerging Software Engineers to build and write code for the Alpha Platform for a new sister company, Creatics. You will implement a groundbreaking project and help develop the Platform into a scalable and engaging Beta consumer site (and application).

Cinequest provides highly fulfilling work and community. This position reports to the Founders and Product Manager, enhances your career skills, and will impact the lives of youth, creators, and consumers. A vibrant, driven, smart, skilled and committed person will thrive on our team.

## REQUIREMENTS & ATTRIBUTES

Software Engineer interns & fellows will join a dynamic team to help code and develop (Alpha to Beta) mobile and web platform and applications. Skills and attributes needed include:

- Back-End Team: Java, Maven, Spring Framework, Thymeleaf, MySQL, AWS (EB, S3, EC2, RDS)
- Front-End Team: HTML, CSS, Javascript, JQuery, AngularJS, NodeJS, Bootstrap, (Java helpful)
- Additional tools: GitHub, IntelliJ IDE
- Meeting the four pillars of our culture: world-class excellence, integrity, high energy and love of our work and services.
- Outstanding problem-solving skills.
- Personal drive to meet objectives and goals.

## BENEFITS

Cinequest positions are very rewarding and fulfilling, allowing each player to gain dynamic, relevant, professional working experience while making a great impact. Benefits include:

- Compensation negotiable
- One-on-one professional development with Executive Team
- Fun and rewarding experience to enhance career skills
- Pride in creating an impactful project
- Future company opportunity
- Headshot and bio listing on Cinequest Meet the Team webpage
